

The Rancho Santa Fe Homeowners Association is currently monitoring recommendations from the Centers for Disease Control and Prevention (CDC) as well as those of federal, state, and local officials, regarding the global coronavirus (COVID-19) outbreak. RSF HOA is taking this situation seriously and it is our goal to slow the transmission of the virus in our community. We are taking the following actions to mitigate community transmission of COVID-19:

Parks

- It is impossible to properly sanitize the playground structures on an as needed basis, hence all RSF tot lots and play equipment will be closed until further notice, and will be fenced off accordingly. We ask that all residents respect the restrictions imposed and not remove the barriers and or use the play structures.
- All RSF basketball courts will be closed until further notice.
- The parks will remain open for walking or other activities during which social distancing can be practiced. Team sports, such as soccer, baseball, basketball, football and other contact sports, do not allow for social distancing and are prohibited until further notice.

Future Meetings

- The RSF Board of Directors meeting scheduled for Wednesday, April 15th will be held online. Updates on how residents can attend/participate will be provided in the near future.
- Architectural meeting have changed to a monthly basis. The next meeting will be held Saturday April 25th. Further details will be provided soon.

To receive updates about the meetings and other important HOA related issues, please provide your email address to Vision Community Management via one of the following

Every individual needs to do their part to slow the spread of COVID-19. Below are just some of the recommended actions you should take

- Educate yourself and your family. Conditions are changing daily.
- Avoid close contact with others, especially people who are sick. Keep a 6-foot zone of space around you. Avoid small and large group settings.
- Cover your cough. Avoid touching your eyes, nose, and mouth.
- Clean and disinfect frequently touched items.
- Wash your hands often for 20 seconds every time. Use sanitizing gel when soap and water are not readily available.
- Know the signs and symptoms of COVID-19. If you are showing symptoms, call your doctor before seeking testing and treatment. Stay home and self-quarantine if mildly ill.
- Create a household plan in case of illness.

Thank you for your cooperation
