

DOVE COVE ESTATES

ARCHITECTURAL GUIDELINES

The following is the approved plants for the community. Plants not on the list may still be used with approval of the design review committee. Homeowners are encouraged to develop a landscaping plan for their properties and then select plants that will look good on the property and in the context of the neighboring properties. Property owners should be mindful of the water and irrigation requirements for specific plants and groups of plants, the maintenance requirements, the size, and shape the selected plants will attain in the coming years.

Homeowners can develop a landscaping plan with a desert theme, or a more lush landscape theme, or a combination of both. Landscaping suited to the Southwest desert environment is highly recommended. Homeowners may use decomposed granite, grass turf, or a combination of both, in the front yard areas.
